

## Mixing valve **MIX M 3-20M - 1" M**

So far in our assortment we did not have a valve with an external thread. To meet the expectations of customers, we have created a new **MIX M 3 - 20M** valve. It has three 1" threaded connections, and thanks to its compact dimensions, it will certainly be used in many home boilers. The valve will also become part of the MIX-BOX systems.
